# Ambulance:

The Solution for All Levels of Medical Transportation

# House-Calls: The Solution to Chronic Hospital Readmissions

## AMBULANCE SERVICES

- CRITICAL CARE TRANSPORT
- ADVANCED LIFE SUPPORT
- BASIC LIFE SUPPORT.
- EMERGENCY RESPONSE.
- EVENT STANDBY SERVICES.

## Amerimed Medical Solutions

provides two solutions under one company:

**Amerimed Emergency Medical Services**  
and  
**Home Physician Care**

flexible solutions for  
pre/post hospital needs

### AMERIMED AMBULANCE

We provide emergency and non-emergency critical care, ALS & BLS ambulance response and transport services throughout North GA. Customer service and clinical excellence are the cornerstone of our business and we work hard every day to earn the trust of our patients customers and the communities we serve.

### HOME PHYSICIAN CARE

We provide house-calls (using Physician Assistants and Nurse Practitioners) to improve patient wellness and reduce avoidable hospital readmissions. Some patients that may benefit from house-calls include:

- Chronic Disease Sufferers
- Home-bound patients
- Mobility Challenges
- Patients recently discharged from Hospital

### Benefit to PATIENTS

Providing patients remote transitional care from hospital to home can decrease their chances of rehospitalization. Seeing patients in their homes within 7-14 days of discharge ensures after-care compliance, avoids medication confusion and improves overall patient wellness.

### Benefit to PHYSICIANS

Patients with chronic illnesses sometimes don't get an opportunity to see their primary MD soon after discharge from the hospital. House calls can coordinate care for the primary care MD and can often times prevent rehospitalization.

### Benefits to HOSPITALS

House calls for recently discharged patients can improve overall wellness and greatly reduce rehospitalizations.
